- | | |
|--------------|---|
| 9:00 - 9:15 | Review of Minutes from July 17, 2014 meeting
Review of Questions/Comments from July 17, 2014 meeting |
| 9:15 -10:15 | Continued group discussion of workgroup goals |
| 10:15 -10:30 | 15 minute break |
| 10:30 -12:00 | Continued group discussion of workgroup goals |

Goal 1: Develop technical guidelines for installation of a waste water dispersal structure for backwash discharge

- Determining daily backwash volume flow from treatment system and sizing wastewater dispersal structure, (group discussion during July 17, 2014 meeting)
- Determining the minimum height of the location of the wastewater dispersal structure above bedrock and the seasonal high groundwater level at the site, (group discussion during July 17, 2014 meeting)
- Establishing criteria to determine when the discharge of LFWTW to a site may create a condition that will interfere with the operation and effectiveness of a subsurface sewage disposal system
- Determining criteria for a Local Director of Health to allow a horizontal separation distance other than what is listed in Table 4.1
- Other installation considerations (i.e. installation of piping to wastewater dispersal structure below the frost line)

Goal 2: Develop a standard form to be used by private well owners for filing the "Record Keeping and Reporting Requirements" of the LFWTW general permit.
